

WE BRING PRODUCTS TO LIFE

Helping you deliver excellence
with specialized printing solutions

TechniPRINT™

Overload   Power

WHO WE ARE

Regardless of a product's shape, size, or material, we can help bring it to life with our specialized industrial graphic solutions.

TechniPrint provides high quality custom decorating services for flat and formed metal, plastic, silicone and rubber products. We've been working with fabricators, finishers and OEMs to create the most durable and visually appealing images on their products for over 40 years.

Exceptional results when you need it most

Product design projects often come with unique needs and challenges. Mistakes can be costly. When projects must be done right, and on time, you can count on us. You will find we get the results you need and are the fastest in the industry. We often complete projects within 10 days following approvals.

FASTEST
IN THE
INDUSTRY

A close-up photograph of a person's hands wearing blue nitrile gloves, working on a custom-built industrial machine. The machine is primarily grey and black, with a prominent red emergency stop button. A metal component with a ruler is visible on the right side. The background is a plain, light-colored surface.

ONE STOP FOR CUSTOM CAPABILITIES

Our range of capabilities allows us to select and customize the best solution based on your unique industry and project specifications. Whether your project requires specialized printing, equipment, materials or expertise, we will help you identify the best methods for achieving durability and eye-catching results.

Industries we serve

MEDICAL DEVICES & EQUIPMENT

Printing on medical devices often requires a high degree of precision as well as inks and processes that withstand multiple sterilizations. Whether plastic, silicone or metal, we can make your product look great and conform to stringent medical specifications for quality and durability.

ELECTRONICS & TECHNOLOGY

Regardless of product size, shape, or surface, we can work together to print directly on your product, or we can create permanent labels, graphic overlays, and user-friendly panel fronts from a variety of materials with durability that withstands the harshest conditions.

CONSUMER PRODUCTS

Clients benefit from a wide range of decorating methods including pad printing, screen printing, laser marking and laser etching which makes us unique. These capabilities, in addition to permanent labels and overlays, can help to bring any consumer product to life.

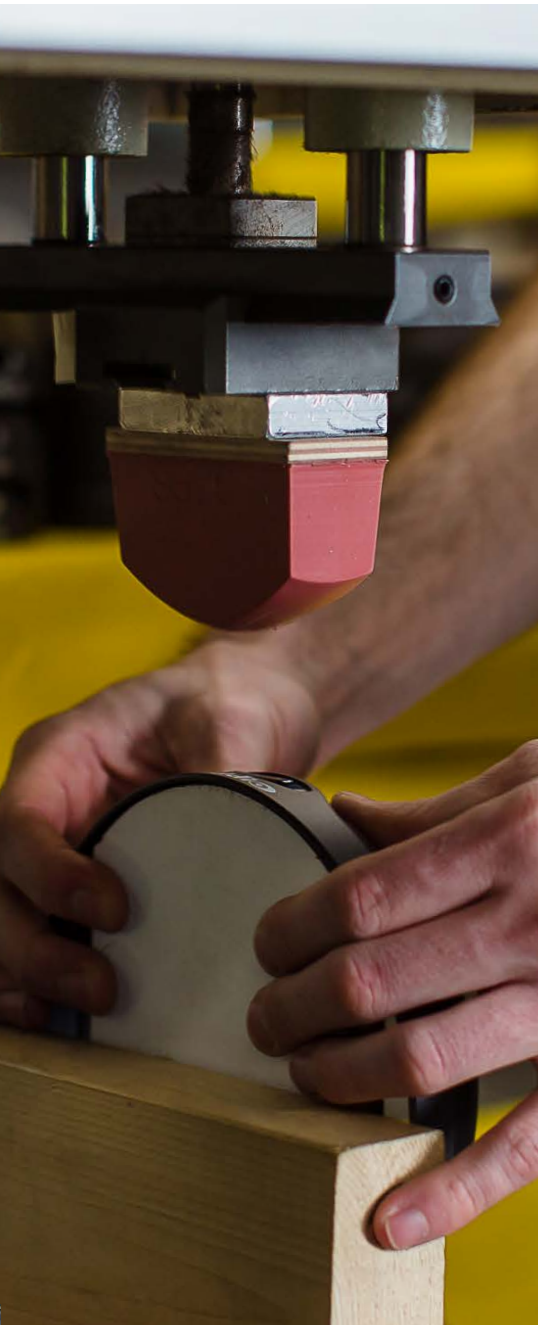

UTILITY EQUIPMENT

We've been supplying high quality labeling products to energy, water and other utility companies for over 30 years. Our engineer grade reflective numbers, letters and labels are available in standard sizes and colors or can be customized to meet your specific design and quantity needs.

The background of the image shows a close-up of industrial machinery. A vertical metal rod or plunger is visible, extending from a dark upper section down towards a blue-painted metal frame at the bottom. The scene is dimly lit, with some highlights on the metal surfaces. A semi-transparent purple rectangular box is overlaid on the center of the image, containing the text.

OVER
40 YEARS OF
EXPERIENCE

Top expertise & dependable service

You'll see that we aren't intimidated by unusual surfaces, materials, contours, or size of text. Take a tour of our facility and see for yourself. It's one way we can demonstrate our expertise and the quality assurance processes we use to ensure high client satisfaction.
